Action Notes

A STOP ORDER-STOP USE was also issued for the main office bathroom per North Georgia Supervisor Michael Lurey. The bathroom must not be used to house any animals until the stop order is released by the Georgia Department of Agriculture. UPDATE: 06-22-2019 stop order-stop use remains

Per North Georgia Supervisor Michael Lurey a STOP ORDER-STOP MOVEMENT was placed for all incoming animals, with the exception of emergency cases and/or bite cases. The stop order will be in effect until released by the Georgia Department of Agriculture. UPDATE: 06-22-2019 STOP ORDER-STOP MOVEMENT released per North Georgia Supervisor Michael Lurey.

Per Georgia Department of Agriculture Assistant State Veterinarian Dr. Hennebelle DVM the three puppies which tested positive for parvo were placed under quarantine until released by the Georgia Department of Agriculture. None of the puppies should be moved without permission of the Georgia Department of Agriculture.

Violation Information

Inspection ID	Category	Issue Date	Est Rlse Date	Rlse Date	Detail
65973	Housekeeping 40-13-13-04(1)(c)	6/21/2019		6/22/2019	40-13-13-04 (c) Housekeeping: Premises (buildings and grounds) must be kept clean and in a state of repair in order to prevent injury or disease. Premises must remain free of accumulations of trash, weeds, debris, and other vermin harborage areas. The housekeeping violation was left due to the dead flies and litter in the floor. UPDATE: 06-22-2019 Violation appeared to be addressed. All debris, dead flies, and litter appeared to be removed.
65973	Pest Control 40-13-13-.04 (1)(g)	6/21/2019			40-13-13-.04 (g) Pest control: An effective program for the prevention, control, and elimination, of vermin, insects, ectoparasites, and avian and mammalian pests must be established and maintained. Vegetation must be manicured to prevent vermin harborage. The pest control violation was left due to the lack of pest control in the front office, namely fly control. UPDATE: 06-22-2019 Per Commissioner Whitfield the shelter is currently working on a contract with a company to establish a pest control regimen to address the flies. There were still flies present during inspection. Violation remains.

Inspection ID	Category	Issue Date	Est Rlse Date	Rlse Date	Detail
65973	Sanitation 40-13-13-.04 (1)(i)	6/21/2019		6/22/2019	 40-13-13-.04 (i) Sanitation of primary enclosures: Primary enclosures for pets must be cleaned at a frequency and intensity to provide a healthy and hygienic environment in order to prevent disease hazards. Excreta must be removed to prevent contamination of the animals contained therein and to reduce the spread of disease. Soiled bedding should be removed and replaced with fresh materials as often as is necessary to keep the animals clean and dry… The sanitation violation was left due to the uncleaned urine, feces, litter, and bedding within and around the cat enclosures, as well as the dog enclosures and uncleaned kennel runs and enclosures throughout the kennel area. UPDATE: 06-22-2019 Violation appeared to be addressed. Facility and the enclosures appeared to be clean and sanitized properly to prevent the spread of disease.
65973	Structural Strength 40-13-13-.04 (1)(o)	6/21/2019			40-13-13-.04 (o) Structural strength: Indoor and outdoor housing for pets must be maintained in good repair. The primary enclosure should be of sufficient strength to contain the animals securely and restrict the entrance of unwanted animals. The walls and/or sides, roof and/or ceiling, and floors and/or bottoms of the primary enclosures must be constructed, so as to, protect the animals from injury or suffering… The structural strength violation was issued due to the walls in the bathroom, which was used to house animals, was not in good state of repair to prevent injury. UPDATE: 06-22-2019 Stop order-stop use will remain on the main office bathroom.
65973	Humane Care 40-13-13-.04 (1)(d)	6/21/2019		6/22/2019	40-13-13-.04 (d) Humane care: Humane care must be provided in all facilities anytime an animal is present. The humane care violation was issued due to the unsanitary conditions of the shelter and three puppies that did not have access to water during inspection. UPDATE: 06-22-2019 Violation appeared to be addressed. All animals on property appeared to have access to water and enclosures appeared to be clean. Animals appeared to be receiving humane care during inspection

Inspection Comments

Upon arrival to the Walker County Animal Shelter met with Walker County Commissioner Shannon Whitfield, Shelter Employee Chloe Clift, and Shelter Volunteer Emily Sadler to perform a re-inspection based on the violations, stop orders, and quarantine left 06-21-2019. There was a sign posted on the door of the shelter stating that due to capacity the shelter was no longer taking incoming animals. The shelter was open for adoptions and Mrs. Sadler stated that many dogs and one cat had been claimed for adoption prior to inspection today. I walked the facility inspecting premises, animals, and their enclosures. There was a current GDA Animal Shelter License posted with an expiration date of 01-31-2020. There were fire extinguishers on property.

I first inspected the main office, the only public entrance to the animal shelter. There were no animals housed in the main office, with the exception of one kitten which was house in the back office room and was undergoing treatment for a URI. That kitten appeared to be housed in a clean enclosure and appeared to have access to food and water. It appeared that the office had been thoroughly cleaned and sanitized. There was minimal odor. The bathroom of the main office had also been used to house animals. The dog that had been previously housed in the bathroom appeared to have chewed through the majority of the sheetrock, exposing the electrical wire. The damages had not been repaired therefore the bathroom will remain under stop order-stop use.

I then walked the kennel area of the shelter with Commissioner Whitfield, Employee Chloe Clift, and Volunteer Emily Sadler. The shelter appeared to be clean and in good state of repair. I was able to accurately count each dog against the computer system

65973

inventory in the shelter during inspection. There were 72 dogs housed in 65 enclosures. It appeared that the shelter had been cleaned and sanitized in a way to prevent the spread of disease. I first went to the intake room. There were puppies housed in four enclosures in the intake room. They appeared to have access to water and food during inspection. The ventilation appeared to be adequate in the room. It appeared to be clean and in good state of repair. Puppy enclosures also appeared to be clean and in good state of repair. There was a secondary room with no cages that was connected to the intake room. That room appeared to have been cleaned and sanitized. The enclosures appeared to provide animals with adequate space to move about freely.

Secondly, I walked the large kennel area, which appeared to be clean and in good state of repair. It appeared that each enclosure and the entire kennel area had been properly cleaned and sanitized to prevent the spread of disease. All animals appeared to have space to move about freely. All animals appeared to have access to water during inspection. I checked the temperature of the shelter twice during my inspection via the wall thermometer in the shelter. At 4:57pm it was approximately 85F degrees, at 5:50pm it had lowered to approximately 84F degrees. The large bay door was closed and it appeared to allow the air conditioning to properly cool the kennel area. I checked all animals in the shelter for signs of heat exposure. All animals appeared to be alert and moving about freely. They did not appear to be panting heavily, have large amounts of drool, or have signs of vomiting, etc. I reiterated that the shelter employees must frequently check the temperature in the shelter and take the appropriate measures to prevent it from becoming over 85F degrees. Large fans were also in use at the shelter and appeared to be circulating air properly.

I then walked the outdoor kennel area. Some dogs in the shelter have access to both the indoor and outdoor sections on the kennels runs; others only have access to one side or the other due to the high number of animals at the shelter. All dogs housed or that had access to the outdoor enclosures appeared to have access to water and shelter from the elements, the outdoor runs appeared to have been properly cleaned and sanitized during inspection.

Lastly, I walked the interior rooms of the kennel area. The first room only stored food, bowls, and supplies. It was clean and in good state of repair. The second room was being utilized to house the cats previously housed in the main office. The cat inventory during inspection was 35 cats and 1 litter of kittens under 8 weeks. The cat enclosures appeared to be clean and in good state of repair. All cats appeared to have access to food and water. All areas around the cat enclosures appeared to be clean and sanitized. The second room was clean and in good state of repair.

The one grey and white kitten that was housed in enclosure Q6, that appeared to have a small infected area on its stomach, had been seen and cleared by a vet prior to inspection on 06-22-2019.

The three kittens housed in a purple cage that had eye discharge had been seen by a vet prior to inspection on 06-22-2019. One kitten was euthanized at the vet's office per the vet's recommendation. One kitten was undergoing treatment for a URI (housed in the main office back room) and one kitten was in the second room during inspection and had been cleared by the vet.

The third room, labeled "staff only" housed three puppies which had tested positive for parvo and had been returned to the shelter. The puppies appeared to be alert and moving about freely, I did not see any loose or bloody stool in their enclosures. The puppies had access to three bowls of water during inspection. The puppies will remain under quarantine until released by the GDA State Vet.

There was one goat housed at the shelter pasture which appeared to be free of disease, appeared to be receiving humane care, and had access to shelter and water.

I did not check records, other than the pet inventory, nor did I witness euthanasia during inspection. There is a current DEA License posted 07-31-2020 held by Dr. Benson DVM. There is currently one employee remaining on the "Lay Persons Letter" that is certified to euthanize.

Below are the following updates regarding the violations, stop orders and quarantine left 06-21-2019 regarding the conditions at Walker County Animal Shelter:

40-13-13-.04(c) Housekeeping: Premises (buildings and grounds) must be kept clean and in a state of repair in order to prevent injury or disease. Premises must remain free of accumulations of trash, weeds, debris, and other vermin harborage areas. The housekeeping violation was left due to the dead flies and litter in the floor. UPDATE: 06-22-2019 Violation appeared to be addressed. All debris, dead flies, and litter appeared to be removed.

40-13-13-.04 (g) Pest control: An effective program for the prevention, control, and elimination, of vermin, insects, ectoparasites, and avian and mammalian pests must be established and maintained. Vegetation must be manicured to prevent vermin harborage. The pest control violation was left due to the lack of pest control in the front office, namely fly control. UPDATE: 06-22-2019 Per Commissioner Whitfield the shelter is currently working on a contract with a company to establish a pest control regimen to address the flies. There were still flies present during inspection. Violation remains.

40-13-13-.04 (i) Sanitation of primary enclosures: Primary enclosures for pets must be cleaned at a frequency and intensity to provide a healthy and hygienic environment in order to prevent disease hazards. Excreta must be removed to prevent contamination

of the animals contained therein and to reduce the spread of disease. Soiled bedding should be removed and replaced with fresh materials as often as is necessary to keep the animals clean and dry... The sanitation violation was left due to the uncleaned urine, feces, litter, and bedding within and around the cat enclosures, as well as the dog enclosures and uncleaned kennel runs and enclosures throughout the kennel area. UPDATE: 06-22-2019 Violation appeared to be addressed. Facility and the enclosures appeared to be clean and sanitized properly to prevent the spread of disease.

40-13-13-.04 (o) Structural strength: Indoor and outdoor housing for pets must be maintained in good repair. The primary enclosure should be of sufficient strength to contain the animals securely and restrict the entrance of unwanted animals. The walls and/or sides, roof and/or ceiling, and floors and/or bottoms of the primary enclosures must be constructed, so as to, protect the animals from injury or suffering... The structural strength violation was issued due to the walls in the bathroom, which was used to house animals, was not in good state of repair to prevent injury. UPDATE: 06-22-2019 Stop order-stop use will remain on the main office bathroom.

40-13-13-.04 (d) Humane care: Humane care must be provided in all facilities anytime an animal is present. The humane care violation was issued due to the unsanitary conditions of the shelter and three puppies that did not have access to water during inspection. UPDATE: 06-22-2019 Violation appeared to be addressed. All animals on property appeared to have access to water and enclosures appeared to be clean. Animals appeared to be receiving humane care during inspection

A STOP ORDER-STOP USE was also issued for the main office bathroom per North Georgia Supervisor Michael Lurey. The bathroom must not be used to house any animals until the stop order is released by the Georgia Department of Agriculture. UPDATE: 06-22-2019 stop order-stop use remains

Per North Georgia Supervisor Michael Lurey a STOP ORDER-STOP MOVEMENT was placed for all incoming animals, with the exception of emergency cases and/or bite cases. The stop order will be in effect until released by the Georgia Department of Agriculture. UPDATE: 06-22-2019 STOP ORDER-STOP MOVEMENT released per North Georgia Supervisor Michael Lurey.

Per Georgia Department of Agriculture Assistant State Veterinarian Dr. Hennebelle DVM the three puppies which tested positive for parvo were placed under quarantine until released by the Georgia Department of Agriculture. None of the puppies should be moved without permission of the Georgia Department of Agriculture.

I will email inspection to Walker County Commissioner Shannon Whitfield.
